(PATENT)

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:
John W. Chae

Application No.: 10/653,970

Confirmation No.: 4467

Filed: September 4, 2003

Art Unit: 3712

For: DOLL HEAD CONSTRUCTION

Examiner: Bena B. Miller

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the restriction requirement mailed February 23, 2004, applicant selects group II drawn to a doll, with traverse.

The restriction requirement has been justified on the ground that the "the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not recite all of the particulars of the subcombination such as the doll." It is respectfully submitted that this assertion is insufficient to justify a restriction requirement. Every genus claim does not recite of the particulars of a species claim which is dependent on it but that fact does evidence the claims define different inventions. If it did, all patents would have only a single claim. The additional justification that the subcombination (the doll) has a separate utility for use as a bed is respectfully submitted also to be insufficient. Anything having a foam material is at least theoretically useful as a bed.

Application No.: 10/653,970

Docket No.: H8000.0001/P0001

The assertion that the two groups have acquired a separate status in the art as shown by their different classification is respectfully submitted not to be justified. The subclass applicable to group I is stated in the Office Action to be "unknown".

Withdrawal of the restriction requirement and examination of all of the claims of this application is respectfully solicited.

Dated: March 19, 2004

Respectfully submitted,

By 

Edward A. Meilman
